## Professional Duplication Towers

### Not All Towers are Created Equal

MF DIGITAL's 5000 Series professional-grade duplication towers deliver outstanding performance, reliability, and quality. Backed by a one-year MF DIGITAL warranty and a responsive, in-house technical support team, the 5000 Series Towers are truly in a class by themselves.

### Simplicity

One-touch intuitive menuing makes MF DIGITAL's 5000 Series Towers as easy to use as a photocopier! And there's no need for a PC!

### Standalone Tower Power

Requiring no PC, these sleekly designed towers offer a hard drive capable of storing multiple CD masters. And because MF DIGITAL's 5000 Series Towers record CDs from hard drive images, not CD to CD, you're always ensured an exact copy, from the first to the last.

### Complete Network Connectivity

MF DIGITAL's license-free network client software allows you to submit, edit, or check status of duplication jobs from any computer across your network. You can even drag-and-drop WAV files from your networked PC directly to your tower to produce a CD with no master.

### Advanced Features Include

- Byte for Byte disc verification
- Audio Track Extraction - Create an audio compilation disc one track at a time from multiple masters
- Durable, heavy-duty steel casing and a 24/7 duty cycle means your MF DIGITAL tower won't overheat
- Runs on a Windows XP-embedded operating system
- 6 drives; 52X CD-R ProDRIVES or 8X DVD±R/24X CD-R drives

### Drive Technology

The 5000 Series towers feature exclusive CD-R ProDRIVE technology, offering enhanced professional audio capabilities. And thanks to the ProDRIVE, MF DIGITAL duplicators are the only ones that allow 100% verification of audio discs.
